
Cateye lamp holder for mining helmet

Description of the solution:

The presented item is a bracket allowing the Cateye lamp to be attached to the JSP EVO3 helmet, using the design of the helmet (model JSP EVO3) and the standard mounting found for Cateye lamps.

Benefits of the solution:

- Improving the visibility of a worker moving through a mine workings.
- Reducing damage to helmets through inappropriate, forcible installation of a lamp.
- Easy installation of the handle on the helmet and the lamp on the handle.

Area of application:

Mining (Personal mining equipment, helmet).

Technology readiness level:

9
