

## Hook screwing in/unscrewing device

### Description of the solution:

The device is a special spanner for screwing in L-shaped hooks, which are used when fitting out walls and other elements of workings, to support cables and all kinds of installations. The fact that the spanner can be used in conjunction with standard drill and screwdriver chucks is a great convenience.

### Benefits of the solution:

- Improving occupational safety - reducing injuries to workers' upper limbs.

### Area of application:

Mining, Assembly work.

### Technology readiness level:

9

### Intellectual property:

Industrial design: RP.28469

### Owner:

KGHM Polska Miedź S.A.
